KEY PROJECTS:

Tiffintom

Technologies Used: Symfony, Angular, Socket, MySQL

Project Description: Tiffintom is an online food delivery website. Where customer can order the food from nearby restaurant. Also we make the website for particular that restaurant for marketing.

Roles and Responsibilities:

- Analysis and create a great user experience for the product.
- Bring creativity and diversity to the frontend.
- Maintain the provided solution by fixing the bugs and providing improvements in modules.
- Leverage socket APIs for deep integrations with all use-cases
- Maintain code to ensure the product is of the highest quality.
- Also made contributions to some of the key modules of the product to provide the best user experience possible.

Direct Agent

Technologies Used: PHP, Angular

Project Description: It's CRM for property management firm, where admin can control the property owners, maintainers and tenants.

Roles and Responsibilities:

- Analysis of the entire project and involvement in the end to end coding
- Leverage APIs for integrations with all use-cases
- Diagnose and fix bugs and performance bottlenecks for performance that feels native.
- Test the developed solutions

Global Foods

Technologies Used: - Symfony, Angular, Android, IOS

It is the business CRM portal. Where can admin can control the restaurants and it's owners. Owners can use the POS devices after registering into this portal. Admin can collect the POS device's rent and manage the payment transactions which are done using this devices. We

collect the all payments to admin's account and admin settle the payments to restaurants within the one week.

Petoriez

Technologies Used: - Symfony, Android, IOS

This is an e-commerce platform that is specifically designed for pet accessories in the UAE region. Shop owners can register their shops and the admin will verify the related documents before allowing them to start selling. Once verified, shop owners can access the business dashboard to add products and manage orders. After processing an order, shop owners can deliver the product and complete the transaction.

EDUCATION:

- Bachelors in Computer Application
